Date : 10/03/2021

Course outcome

The goal of the course is to provide comprehensive, individually focused training to the students that prepare them for providing a quality physiotherapy care to the patients.

Upon completion of graduate program in physiotherapy, the student should:

1. Gain the adequate knowledge of the basic medical subjects in the practice of physiotherapy.
2. Develop skills and techniques for application of exercises and electrotherapy modalities for the management of various medical and surgical conditions.
3. Ability to choose, demonstrate intervention safely and document the progression appropriately.
4. Ability to practice moral and ethical values.
5. Ability to communication effectively and flexibly in a manner that is appropriate for the patients and other healthcare professionals.
6. Ability to identify unethical behavior and adopting objective, unbiased and truthful actions in all aspects of their program.
7. Develop proper attitude of care and concern in practice of physiotherapy.
8. Capability to solve problems by using research-based knowledge and research methods and can set short term and long term goals for rehabilitation.
9. Demonstrate skill in teaching, management, research, guidance and counseling.
10. Develop a sense of research to predict cause-and-effect relationships.
